

The 2013 Endourology Fellowship Match will now include a match for a 2-year fellowship position and a match for a 1-year fellowship position. **Programs may offer both 1 year and 2 year training.** Each Match will be conducted separately. The 2-year fellowship match will be conducted first and will require all programs with 2-year positions and applicants that are interested to submit a preference list when requested. The 1-year certificate of advanced clinical training match will be conducted soon after. Programs with 1-year positions may choose to submit a preference list and applicants that are interested should submit a preference list when requested. Any unmatched applicants from the 2-year fellowship programs **may participate in the one year match.** Programs who offer both 1 year and 2 year training positions may elect to opt out of the 1 year match after completion of the 2 year match process. The candidates should be informed by the programs of this possibility prior to the match.

If you should have any questions, please contact the Endourological Society directly at endourological@aol.com .
