INSTITUTIONAL REQUIREMENTS

The training program must have an affiliation with an ACGME or Royal College of Physicians and Surgeons accredited urology residency program or a nationally accredited alternative body such as a medical school. The sponsoring institution must have sufficient clinical volume and technology to meet the needs of the fellowship trainee.

The sponsoring institution must have a solid research environment. Fellows are expected to participate in translational and/or basic science research for at least 12 months. They must work in either a laboratory which has external funding (NIH, NCI etc) or in which the mentor is doing novel research and has had a history of publications in high impact scientific journals. Another option is for the fellow to complete an advanced degree (Masters) during these two years such as a MPH, MPHE, Masters in clinical research, Masters in a biological discipline (pathology, biochemistry, molecular genetics, physiology, pharmacology etc.) or MBA.

Director of Fellowship: ________________________________

Institution: _________________________________________

Affiliated with Residency Program/Medical School ________________________

INSTITUTIONAL OPERATIVE EXPERIENCE:

Fellows must actively participate in at least the following number of operations during the 2 year course of training:

- 150 robotic cases, 30 of which should be upper and lower

Please complete the information below as it pertains to your institution

Laparoscopic/Robotic procedures per year _______________________
RESEARCH REQUIREMENTS:

The sponsoring institution must have a solid research environment. Fellows are expected to participate in translational and/or basic science research for at least 12 months. They must work in either a laboratory which has external funding (NIH, NCI, DOD, etc) or in which the mentor is doing novel research and has had a history of publications in high impact scientific journals. Another option is for the fellow to complete an advanced degree (Masters) during these two years such as a MPH, MPHE, Masters in clinical research, Masters in a biological discipline (pathology, biochemistry, molecular genetics, physiology, pharmacology etc.).

Equipment - Will fellow have access to ultrasound evaluation of the kidney?

________   ________
Yes        No

Lab

Lab space available               _____ sq. feet
Bench space available             _____ linear feet

Current Grant Support for Research____________________

Statistical Support               _______    _______
                                  Yes                 No

Access to small animal facilities     ________ ________
                                  Yes         No

Access to pig lab                   ________ ________
                                  Yes         No

Number of Ph.D.’s in Department or available to fellow:

________

Current Research Projects:_______________________________
