INSTITUTIONAL REQUIREMENTS

The training program must have an affiliation with an ACGME or Royal College of Physicians and Surgeons accredited urology residency program or a nationally accredited alternative body such as a medical school. The sponsoring institution must have sufficient clinical volume and technology to meet the needs of the fellowship trainee.

The sponsoring institution must have a solid research environment. Fellows are expected to participate in translational and/or basic science research for at least 12 months. They must work in either a laboratory which has external funding (NIH, NCI etc) or in which the mentor is doing novel research and has had a history of publications in high impact scientific journals. Another option is for the fellow to complete an advanced degree (Masters) during these two years such as a MPH, MPHE, Masters in clinical research, Masters in a biological discipline (pathology, biochemistry, molecular genetics, physiology, pharmacology etc.) or MBA.

Director of Fellowship: _________________________________________________________

Institution: __________________________________________________________________

Affiliated with Residency Program/Medical School __________________________________

INSTUTIONAL OPERATIVE EXPERIENCE:

Fellows must actively participate in at least the following number of operations during the 2 year course of training:

- 60 retrograde ureteroscopic – uretero-renoscopic cases,
- 60 percutaneous renal cases,
- 100 laparoscopic or robotic assisted cases,
- At least 20 of these 100 robotic assisted or laparoscopic cases must be upper and lower urinary tract operations

Please complete the information below as it pertains to your institution

1. Number of percutaneous renal procedures including Stone extraction, endopyelotomies, Whitaker test, & other renal procedures per year ________________

2. Ureteroscopic procedures - rigid and flexible per year ________________

3. Laparoscopic/Robotic procedures per year ________________________
